Safety Data Sheet

Material Name: Manganese Sulfate, Monohydrate

ID: C1-127

*** Section 1 - Identification ***

Chemical Name: Manganese Sulfate, Monohydrate
Product Use: For Commercial Use

RESTRICTIONS on USE

NOT TO BE USED AS A PESTICIDE. THIS PRODUCT IS NOT TO BE USED IN VIOLATION OF ANY PATENTS. CHEM ONE LTD. DISCLAIMS ANY AND ALL WARRANTIES, EITHER EXPRESSED OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR APPLICATION. IN NO EVENT SHALL CHEM ONE LTD. OR ITS SUPPLIERS BE LIABLE FOR ANY DAMAGES WHATSOEVER INCLUDING DIRECT, INDIRECT, INCIDENTAL, CONSEQUENTIAL, LOSS OF BUSINESS PROFITS OR SPECIAL DAMAGES, EVEN IF CHEM ONE LTD. OR ITS SUPPLIERS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME STATES DO NOT ALLOW THE EXCLUSION OF LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SO THE FOREGOING LIMITATION MAY NOT APPLY.

Supplier Information
Chem One Ltd.
14140 Westfair East Drive
Houston, Texas 77041-1104

Emergency # (800) 424-9300 or +1 (703) 527-3887

NOTE: Emergency telephone numbers are to be used only in the event of chemical emergencies involving a spill, leak, fire, exposure, or accident involving chemicals. All non-emergency questions should be directed to customer service.

*** Section 2 – Hazard(s) Identification ***

GHS HAZARD

Hazard Classes
Specific target organ toxicity repeated exposure
Chronic aquatic toxicity

Hazard Categories
Category 2
Category 2

Signal Word: Warning

Pictograms:

Hazard Statements

PHYSICAL HAZARDS:
None

HEALTH HAZARDS:
H373: May cause damage to organs through prolonged or repeated exposure

ENVIRONMENTAL HAZARDS:
H411: Toxic to aquatic life with long lasting effects

PRECAUTIONARY STATEMENTS:
P102: Keep out of reach of children
P202: Do not handle until all safety precautions have been read and understood
P260: Do not breathe dust/fume/gas/mist/vapors/spray.
P273: Avoid release to the environment.
RESPONSE STATEMENTS:

P314: Get medical advice/attention if you feel unwell.
P391: Collect spillage.

STORAGE STATEMENTS:

None

DISPOSAL STATEMENTS:

P501: Dispose of content and/or container in accordance with local, regional, national or international regulations

Hazards not otherwise classified (HNOC):

No data available

Component Related Regulatory Information

This product may be regulated, have exposure limits or other information identified as the following: Manganese (7439-96-5), Manganese, elemental & inorganic compounds, as Mn, and Manganese fume, Mn

Synonyms: Sulfuric Acid, manganese (2+) salt (1:1), Monohydrate; Manganese mesosulfate; Manganese sulfate monohydrate.

*** Section 4 - First Aid Measures ***

Emergency Overview

Manganese Sulfate Monohydrate is a light gray to light pink solid in granular or powder form. The primary health hazard associated with this product is the potential for irritation of the eyes, skin, nose and other tissues that come in contact with dusts or particulates of this product. Inhalation overexposures may cause metal fume fever. Thermal decomposition of this product produces irritating vapors and toxic gases (e.g. sulfur oxides and manganese). Emergency responders should wear proper personal protective equipment for the releases to which they are responding.

Potential Health Effects: Eyes

Exposure to particulates or solution of Manganese Sulfate Monohydrate may cause irritation of the eyes with symptoms such as stinging, tearing and redness. Prolonged contact may cause corneal injury and conjunctivitis.

Potential Health Effects: Skin

Manganese Sulfate Monohydrate can cause irritation of the skin, with symptoms such as reddening, discomfort and itching. Repeated skin contact may lead to dermatitis (red, cracked skin).

Potential Health Effects: Ingestion

Ingestion of Manganese Sulfate Monohydrate can cause nausea, vomiting, and abdominal cramps. Chronic ingestion of this product may cause systemic poisoning with symptoms similar to those described for chronic inhalation.

Potential Health Effects: Inhalation

Breathing dusts or particulates generated by Manganese Sulfate Monohydrate can lead to irritation of the nose, throat or respiratory system. Symptoms of such exposure could include coughing, sneezing, coughing and bronchitis. Repeated or prolonged exposure can cause metal fume fever, with resulting flu-like symptoms of chills and fever, sweating, and weakness. Chronic overexposure can also cause central nervous system effects including muscle weakness, speech impairment, insomnia, tremors and mental incapacity. Symptoms of such reaction can be delayed for several years.

First Aid: Eyes

In case of contact with eyes, rinse immediately with plenty of water for at least 20 minutes. Seek immediate medical attention if adverse effect occurs.

First Aid: Skin

Remove all contaminated clothing. For skin contact, wash thoroughly with soap and water for at least 20 minutes. Seek immediate medical attention if irritation develops or persists.
First Aid: Ingestion
DO NOT INDUCE VOMITING. Have victim rinse mouth thoroughly with water, if conscious. Never give anything by mouth to a victim who is unconscious or having convulsions. Contact a physician or poison control center immediately.

First Aid: Inhalation
Remove source of contamination or move victim to fresh air. Apply artificial respiration if victim is not breathing. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Administer oxygen if breathing is difficult. Get immediate medical attention.

First Aid: Notes to Physician
Provide general supportive measures and treat symptomatically.

*** Section 5 - Fire Fighting Measures ***

General Fire Hazards
Manganese Sulfate Monohydrate is not combustible.

Hazardous Combustion Products
Manganese and sulfur oxide.

Extinguishing Media
Use methods for surrounding fire.

Fire Fighting Equipment/Instructions
Firefighters should wear full protective clothing including self-contained breathing apparatus. Cool containers with flooding quantities of water. If possible control runoff from fire control or dilution water to prevent environmental contamination.

NFPA Ratings: Health Hazard: 2* Fire Hazard: 0 Physical Hazard: 0
Hazard Scale: 0 = Minimal 1 = Slight 2 = Moderate 3 = Serious 4 = Severe * = Chronic hazard

*** Section 6 - Accidental Release Measures ***

Containment Procedures
Stop the flow of material, if this can be done without risk. Contain the discharged material. If sweeping of a contaminated area is necessary use a dust suppressant agent, which does not react with product (see Section 10 for incompatibility information). Keep spilled material dry and away from moisture.

Clean-Up Procedures
Small releases can be cleaned-up using impervious gloves, goggles and suitable body protection. In case of a large spill (in which excessive dusts can be generated), clear the affected area, protect people, and respond with trained personnel. Place all spill residues in an appropriate container and seal. Thoroughly wash the area after a spill or leak clean-up. Prevent spill rinsate from contaminating of storm drains, sewers, soil or groundwater.

Evacuation Procedures
Evacuate the area promptly and keep upwind of the spilled material. Isolate the spill area to prevent people from entering. In case of large spills, follow all facility emergency response procedures.

Special Procedures
Remove soiled clothing and launder before reuse. Avoid all skin contact with the spilled material. Have emergency equipment readily available.
**Section 7 - Handling and Storage**

**Handling Procedures**
All employees who handle this material should be trained to handle it safely. Do not breathe dust. Avoid all contact with skin and eyes. Use this product only with adequate ventilation. Wash thoroughly after handling.

**Storage Procedures**
Keep container tightly closed when not in use. Store containers in a cool, dry location, away from direct sunlight, sources of intense heat, or where freezing is possible. Material should be stored in secondary containers or in a diked area, as appropriate. Store containers away from incompatible chemicals (see Section 10, Stability and Reactivity). Storage areas should be made of fire-resistant materials. Post warning and “NO SMOKING” signs in storage and use areas, as appropriate. Use corrosion-resistant structural materials, lighting, and ventilation systems in the storage area. Floors should be sealed to prevent absorption of this material. Inspect all incoming containers before storage, to ensure containers are properly labeled and not damaged. Have appropriate extinguishing equipment in the storage area (i.e., sprinkler system, portable fire extinguishers).

Empty containers may contain residual particulates; therefore, empty containers should be handled with care. Do not store this material in open or unlabeled containers. Limit quantity of material stored.

**Section 8 - Exposure Controls / Personal Protection**

**Exposure Guidelines**

**A: General Product Information**
Follow the applicable exposure limits.

**B: Component Exposure Limits**
The exposure limits given are for Manganese, elemental & inorganic Compounds, as Mn (7439-96-5) or Manganese fume, as Mn.

- ACGIH: 0.2 mg/m³ TWA (fume & manganese, elemental & inorganic compounds, as Mn)
- Notice of Intended Change: 0.03 [respirable fraction] (fume & manganese, elemental & inorganic compounds, as Mn)
- OSHA: 5 mg/m³ STEL, ceiling (fume & manganese, elemental & inorganic compounds, as Mn)
  Vacated 1989 PEL: TWA = 1 mg/m³ (fume); STEL = 3 mg/m³ (fume)
- DFG MAKs: 0.5 mg/m³ TWA, Ceiling,
  Peak: 3•MAK, 15 minutes, average value, 1-hr interval (fume)
- NIOSH: 1 mg/m³ TWA
  3 mg/m³ STEL
  500 mg/m³ IDLH

**Engineering Controls**
Use mechanical ventilation such as dilution and local exhaust. Use a corrosion-resistant ventilation system and exhaust directly to the outside. Supply ample air replacement. Provide dust collectors with explosion vents.

**PERSONAL PROTECTIVE EQUIPMENT**

**Personal Protective Equipment: Eyes/face**
Wear safety glasses with side shields or chemical goggles. If necessary, refer to U.S. OSHA 29 CFR 1910.133.

**Personal Protective Equipment: Skin**
Personal Protective Equipment: Respiratory

Maintain airborne contaminant concentrations below exposure limits listed in Section 2 (Composition and Information on Ingredients), if applicable. If respiratory protection is needed, use only protection authorized in the U.S. Federal OSHA Standard (29 CFR 1910.134), and applicable U.S. State regulations. Oxygen levels below 19.5% are considered IDLH by OSHA. In such atmospheres, use of a full-facepiece pressure/demand SCBA or a full facepiece, supplied air respirator with auxiliary self-contained air supply is required under OSHA’s Respiratory Protection Standard (1910.134-1998). If airborne concentrations are above the applicable exposure limits, use NIOSH-approved respiratory protection. The following NIOSH Guidelines for Manganese and Compounds (as Mn) are presented for further information.

- Up to 10 mg/m³: Dust and mist respirator except single-use and quarter-mask respirator or SAR.
- Up to 25 mg/m³: SAR operated in a continuous-flow mode, or powered air-purifying respirator with dust and mist filters.
- Up to 50 mg/m³: Full-facepiece respirator with high-efficiency particulate filter(s), or SAR with a tight-fitting facepiece operated in a continuous-flow mode, or powered air-purifying respirator with tight-fitting facepiece and high-efficiency particulate filter, or full-facepiece SCBA, or full-facepiece SAR.
- Up to 500 mg/m³: Positive pressure SAR.

NIOSH Guidelines for Manganese and Compounds (as Mn) [continued]:

- Emergency or Planned Entry into Unknown Concentrations or IDLH Conditions: Positive pressure, full-facepiece SCBA, or positive pressure, full-facepiece SAR with an auxiliary positive pressure SCBA.
- Escape: Full-facepiece respirator with high-efficiency particulate filter(s), or escape-type SCBA.
- NOTE: The IDLH concentration for Manganese Compounds and fume (as Mn) is 500 mg/m³.

Personal Protective Equipment: General

Have an eyewash fountain and safety shower available in the work area. Wash hands thoroughly after handling material.

Protective Clothing Pictograms:

- Splash Goggles
- Gloves
- Protective Apron
- Dust Respirator

*** Section 9 - Physical & Chemical Properties ***

Physical Properties: Additional Information

The data provided in this section are to be used for product safety handling purposes. Please refer to Product Data Sheets, Certificates of Conformity or Certificates of Analysis for chemical and physical data for determinations of quality and for formulation purposes.
Material Name: Manganese Sulfate, Monohydrate

**Appearance:** Light gray or pink powder or granules

**Physical State:** Solid

**Vapor Pressure:** Not applicable

**Initial boiling point and boiling range:** Not available

**Solubility (H2O):** Freely soluble in water

**Freezing Point:** Not applicable

**Softening Point:** Not applicable

**Molecular Weight:** 169.01

**Flash Point:** Not flammable

**Upper Flammable Limit (UEL):** Not applicable

**Auto Ignition temperature:** Not applicable

**Rate of Burning:** Not applicable

**Evaporation rate:** Not applicable

**Decomposition temperature:** Not available

**Odor:** Odorless

**pH:** Slightly acidic in water

**Vapor Density:** Not applicable

**Melting Point:** 1292 deg F (700 deg C)

**Specific Gravity:** 2.95 (H2O = 1)

**Particle Size:** All grades from 16-325 mesh (40% powder grade is > 325 mesh)

**Bulk Density:** All grades from 0.60-1.50 g/cm3

**Chemical Formula:** MnSO4•H2O

**Odor threshold:** Not applicable

**Lower Flammable Limit (UEL):** Not applicable

**Flammability (solid, gas):** Not flammable

**Relative density:** Not available

**Partition coefficient: n-octanol/water:** Not available

**Viscosity:** Not applicable

---

**Section 10 - Chemical Stability & Reactivity Information**

**Chemical Stability**

Stable.

**Chemical Stability: Conditions to Avoid**

Avoid high temperatures, moisture, and incompatible materials.

**Incompatibility**

Manganese Sulfate, Monohydrate is incompatible with powdered metals, strong acids and strong oxidizing materials.

**Hazardous Decomposition**

Sulfur oxides and manganese.

**Hazardous Polymerization**

Will not occur.

---

**Section 11 – Toxicological Information**

**Acute and Chronic Toxicity**

**A: General Product Information**

May cause eye, skin, nose, throat and respiratory tract irritation. Depending on the duration of contact, over-exposures can irritate or burn the eyes. If inhaled, irritation of the respiratory system can occur, with coughing and breathing difficulty. Harmful if swallowed: Inhalation over-exposures may cause metal fume fever, with resulting flu-like symptoms.

Chronic: Long term skin overexposure to this product may lead to dermatitis (red, itchy skin). Chronic inhalation or ingestion overexposures can cause central nervous system effects including muscle weakness, impairment of speech, insomnia and incoordination. Chronic overexposure to this product may also cause kidney damage, changes in the liver and blood disorders.

**B: Component Analysis - LD50/LC50**

Manganese (7439-96-5):

Oral-rat LD50 = 9 g/kg

**C: Component Analysis - TDLo/LDLo**

Manganese Sulfate Monohydrate (10034-96-5):

TDLo (Oral-Rat) 42 gm/kg/14 days-continuous: Liver: changes in liver weight; Blood: changes in other cell count (unspecified), changes in leukocyte (WBC) count; TDLo (Oral-Rat) 28437 mg/kg/13 weeks-continuous: Lungs, Thorax, or Respiration: changes in lung weight; Blood: changes in leukocyte (WBC) count; Nutritional and Gross Metabolic: weight loss or decreased weight gain; TDLo (Oral-Mouse) 546 gm/kg/13 weeks-continuous: Liver: changes in liver weight; Blood: pigmented or nucleated red blood cells, other changes; TDLo (Oral-Mouse) 1314 gm/kg/2 years-continuous: Tumorigenic: equivocal tumorigenic agent by RTECS criteria; Endocrine: thyroid tumors; TDLo (Oral-Mouse) 513 mg/kg: male 5 day(s) pre-mating: Reproductive: Paternal Effects: spermatogenesis (incl. genetic material, sperm morphology, motility, and count)
Carcinogenicity

A: General Product Information
There was equivocal evidence of carcinogenic activity of Manganese Sulfate, Monohydrate in male and female mice, based on the marginally increased incidences of thyroid gland follicular cell adenoma and the significantly increased incidences of follicular cell hyperplasia.

B: Component Carcinogenicity
None of this product's components are listed by ACGIH, IARC, NIOSH, NTP, or OSHA.

Epidemiology
Workers in plants having high levels of manganese dust showed high incidence of respiratory disease, and pathologic changes included epithelial necrosis with symptoms similar to Parkinson’s disease and rigidity of facial expression.

Neurotoxicity
Manganese Sulfate, Monohydrate is a neurotoxin. Combination of ingestion and inhalation can incur harmful effects on the central nervous system. Symptoms may include leg cramps, tremors, difficult walking, poor coordination, memory loss, questionable judgment and unstable emotions.

Mutagenicity
Manganese Sulfate, Monohydrate was active for gene conversion and mutations in S. cerevisiae, and for inducing translocations, in Cytogenetic analysis, Sperm Morphology and Sister Chromatid exchange in mice.
Mutation in Microorganisms (Yeast-Saccharomyces cerevisiae) 40 µmol/L; Gene Conversion and Mitotic Recombination (Yeast-Saccharomyces cerevisiae) 40 µmol/L; Micronucleus Test (Oral-Mouse) 205 mg/kg/24 hours-continuous; Cytogenetic Analysis (Oral-Mouse) 718 mg/kg/7 days-continuous; Cytogenetic Analysis (Hamster-Ovary) 180 mg/L; Sperm Morphology (Oral-Mouse) 513 mg/kg/5 days-continuous; Sister Chromatid Exchange (Hamster-Ovary) 5 mg/L

Teratogenicity
Tests in mice produced spermatogenesis (including genetic material, sperm morphology, motility and count) in mice.

Other Toxicological Information
Workers exposed to airborne manganese have had a higher incidence of pneumonia. Victims of manganese poisoning have reported impotence and decreased sexual desire.

*** Section 12 - Ecological Information ***

Ecotoxicity

A: General Product Information
Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

B: Ecotoxicity:
Toxic to fish and aquatic organisms

Environmental Fate:
Water hazard class I (German Regulation) (Self-assessment): slightly hazardous for water
Do not allow to enter waters, waste water, or soil.

*** Section 13 - Disposal Considerations ***

US EPA Waste Number & Descriptions
A: General Product Information
As shipped, this product is not considered a hazardous waste by EPA.

B: Component Waste Numbers
No EPA Waste Numbers are applicable for this product's components.
Disposal Instructions
All wastes must be handled in accordance with local, state and federal regulations or with regulations of Canada and its Provinces. This product, if unaltered by use, may be disposed of by treatment at a permitted facility or as advised by your local hazardous waste regulatory authority.

**Section 14 - Transportation Information**

NOTE: The shipping classification information in this section (Section 14) is meant as a guide to the overall classification of the product. However, transportation classifications may be subject to change with changes in package size. Consult shipper requirements under I.M.O., I.C.A.O. (I.A.T.A.) and 49 CFR to assure regulatory compliance.

US DOT Information

UN/NA #: UN 3077
Shipping Name: Environmentally Hazardous Substance, solid, n.o.s. (MANGANESE SULFATE MONOHYDRATE)
Hazard Class: 9
Packing Group: III
Required Label(s): Class 9
Special Provision: 8, 146, 335, 384, A112, B54, B120, IB8, IP3, N20, N91, T1, TP33

55th Edition International Air Transport Association (IATA):
Please refer to the most recent edition of the “International Air Transport Association (IATA)” Regulations

International Maritime Organization (I.M.O.) Classification
Please refer to the most recent Amendment of the “International Maritime Dangerous Goods (IMDG) Code”

**Section 15 - Regulatory Information**

US Federal Regulations

A: General Product Information
No additional information.

B: Component Analysis
This material contains one or more of the following chemicals required to be identified under SARA Section 302 (40 CFR 355 Appendix A), SARA Section 313 (40 CFR 372.65) and/or CERCLA (40 CFR 302.4):

SARA 313: Category code N450 (as Manganese compounds) for reporting under Section 313.
CERCLA: There is no RQ assigned to this broad class (Manganese compounds), although the class is a CERCLA hazardous substance.
